

AdBlue:

AdBlue is a brand name for an additive liquid used in diesel vehicles to reduce emissions of harmful gases, especially Nitrogen oxides (NOX).

AdBlue is a clear, non-toxic and non-flammable liquid that has become increasingly popular in global efforts to reduce air pollution and reduce harmful effects of diesel vehicles on the environment and human public health.

Specifications:

Description	Clear liquid	Visual
Odor	Odorless	---
Freezing Point	-11	°C
Solubility in water	Miscible	g/100 mL
Density	1.089	g/cm ³

How does AdBlue work in special diesel vehicles?
